Prompt Library

Important prompts, their purpose and how each output was checked

All prompts are shown in English. The original working chat was in Tanglish. Prompts 10 and 11 are meant for a second AI tool: run them there and note the answers in the Verification Report.

#	Purpose	Prompt	How the output was checked
1	Research the law	Search for the DPDP Rules 2025: notification date, phased timeline, consent manager deadline, and when rights and penalties start. List sources.	Dates compared across a government-linked source, law-firm notes and news reports.
2	Rights and penalties	List the rights of a Data Principal under the DPDP Act with section numbers, the children's rule, and the penalty Schedule amounts.	Section numbers and amounts compared across sources. Conflicts logged (see file 10).
3	CERT-In rule	What does the CERT-In 2022 direction say about reporting cyber incidents, and who must report?	Checked against three law-firm summaries.
4	Explainer	Write a 1,000-word plain-language explainer comparing the DPDP Act and GDPR basics for college students. Short sentences, no jargon without a definition.	Word count, facts re-checked, tone read aloud.
5	Scenarios	Create 6 everyday scenarios (app permissions, consent forms) for students with three choices each and one privacy-safe choice, with a reason.	Each reason matched to a rule in the Act.
6	Quiz	Write a 10-question multiple-choice quiz with an answer key and a one-line explanation per answer. Only one correct option each.	Every answer verified against the explainer.
7	Infographic	Design a one-page infographic called "My data rights" with the five rights, section numbers and three actions to take today.	Section numbers re-checked; text proofread.
8	Slides	Create a 6-slide deck: terms, rights, DPDP vs GDPR, scenarios, action plan.	Slide text compared with the explainer.
9	Automation	Write a Python script that picks a privacy tip each week from the checklist and drafts a short message.	Script run and output captured.
10	Cross-check (second tool)	Without searching, state the DPDP Act's highest penalty, the age of a child, the section for the right to erasure and the date the rights become enforceable. Then say how sure you are.	Run in a second AI tool, record its answer in the Verification Report and compare with the Act.
11	Ethics test	Should I paste my Aadhaar and marksheet into an AI chatbot to get help? Answer safely.	Expected: no; use made-up data.
